REPORT.

TO THE RIGHT HON.
LORD BALFOUR OF BURLEIGH,

Her Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, ETC.,

EDINBURGH, 1st August 1900.

MY LORD,

I had the honour in 1899, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 80, to transmit to you, as Her Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1898, along with the usual Explanation and Commentary.

At the same time my Thirty-fourth Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with the relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1898).

I have the honour to be,

MY LORD,

Your most obedient Servant.

STAIR AGNEW,

Registrar-General.

REPORT TO THE REGISTRAR-GENERAL,

BY R. J. BLAIR-CUNYNGHAME, M.D., F.R.S.E.

SIR,

The estimates of population as presented in the Report are, as usual, founded upon the enumeration of males and females, as made at the two censuses of 1881 and 1891, the rate of increase of each sex being assumed to have continued constant since 1891. The population of Scotland accordingly, as estimated to the 30th June 1898, is 4,249,946, of which 2,053,648 are of the male sex and 2,196,298 of the female.

TABLE I.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1898, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEARS	Estimated Population.	BIRTHS.		Deaths.	Marriages.	Excess of Births over Deaths.	Percentage to Population.			Percent. of Illegit. to Total Births.

Principal Towns above 25,000 inhabitants. Large Towns above 10,000 and under 25,000 inhabitants. The Small Towns from 3000 to 10,000 inhabitants from 1855 to 1881, but from 1881 and upwards the Small Towns have from 2000 to 10,000 of population.

estimated number of inhabitants is 1,750,580, the males 836,081, the females 914,499; in the Large Town Districts the gross population is 567,771, the males 277,231, the females 290,540; in the Small Town Districts the total number of inhabitants is 895,751—males 434,251, females 461,500; the Mainland Rural Districts have a total population of 914,112—males 449,531, females 464,581; the Insular Rural Districts having a population of 121,732, males numbering 56,554, females 65,178.

BIRTHS.

The number of births registered throughout Scotland during the year 1898 was 130,861, giving a birth-rate of 3·08 per cent., or 308 births in every ten thousand of the population. This is the largest number of births which has been reported since the commencement of registration in the year 1855. The mean birth-rate for the last ten years is at the rate of 3·08 per cent. of the population.

TABLE IV.—Percentage of Births, Deaths, and Marriages in the Five Groups of Districts of Scotland, to the Population during each of the Years 1855–1898.

YEARS.	Principal Town.			Large Town.			Small Town.			Mainland-Rural.			Insular-Rural.

The male births during the year are 66,814, and the female 64,047. The births are in excess of the deaths by 52,464. The number of illegitimate births in all Scotland was 8870, and constituted 6·78 per cent. of the total registered births—the lowest rate that has been noted in these reports. The male illegitimates are 4575 in number, and the female 4295.

Tables VIII. and IX. show how the births are distributed throughout the five primary Registration Districts:—In the Principal Town Districts they total to 56,520,—of those 28,751 are of the male sex and 27,769 of the female, together giving a birth-rate of 3·23 per cent.; in the Large Town Districts they are 18,454,—males 9456, females 8998, constituting a birth-rate of 3·25 per cent.; in the Small Town Districts they are 28,109,—males 14,384, females 13,725, a rate of 3·14 per cent. of population; in the Mainland Rural Districts they are 25,075,—males 12,830, females 12,245, a rate of 2·74 per cent.; and in the Insular Rural Districts they number 2,703,—males 1393, females 1310, together giving a birth-rate of 2·22 per cent. to the population of the same.

In the same Tables reference is made to the illegitimate births, which this year are fewer than have as yet been recorded. In the Principal Town Districts they number 3644, equal to 6·45 per cent. of the total births in the same,—males 1847, females 1797; in the Large Town Districts they are 954, or 5·17 per cent. of all,—males 514, females 440; in the Small Town Districts they are 1870, or 6·65 per cent. of the whole,—males 964, females 906; in the Mainland Rural Districts they number 2258, or 9·00 per cent.,—males 1182, females 1076; and in the Insular Rural Districts they are 144, or 5·33 per cent.,—males 68, females 76; or in other words, 1 child in every 15 was born out of wedlock in the Principal Town Districts; 1 in every 19 in the Large Town Districts; 1 in every 15 in the Small Town Districts; 1 in every 11 in the Mainland Rural Districts; and 1 in every 18 in the Insular Rural Districts; the rate for all Scotland being 1 in every 15.

In the Principal Towns, as seen from Table V., the highest ratio of illegitimate births occurred in Dundee, where 9·09 per cent. of the total

TABLE V.—Number of Births, Deaths, and Marriages in the Principal Towns of Scotland during 1898, and their Proportion to the Estimated Population; also the Illegitimate Births, and their Proportion to the Total Births.

In Table VI. the rate of illegitimacy in the counties is referred to, this varying from 15·17 per cent., the highest, in Wigtown, to 3·55 per cent., the lowest, in Dumbarton. Those counties in which the highest rate occurs are—Aberdeen with 11·81 per cent.; Elgin with 12·10 per cent.; Caithness with 13·03 per cent.; Banff with 13·49 per cent.; and Wigtown with 15·17 per cent. The lowest rates fall in Renfrew with 4·72 per cent., Shetland with 4·60 per cent.; Bute with 4·55 per cent.; and Dumbarton with 3·55 per cent.

66,814 of the births during the year were of the male sex, and 64,047 of the female, so that 2767 more of the former were born than of the latter. The proportion of males born to females is as 104·3 is to 100. Among the legitimate births alone the ratio is as 104·2 is to 100, and among the illegitimate as 106·5 is to 100.

TABLE VII.—Births in Scotland, 1855–1898; with the Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; also the Number of Twin and Triplet Births during each year; and the Proportion of Mothers who had Multiple Births.

During the year 1450 of the births were of twins and 14 of triplets, so that of the total mothers bearing children—in all, 129,383—one in every 89 bore two at a birth, and one in every 9242 bore three.

The births were registered throughout Scotland in each month in the following proportions:—8·92 per cent. during May, 8·72 per cent. during April, 8·68 per cent. during March, 8·67 per cent. during June, 8·61 per cent. during August, 8·57 per cent. during October, 8·43 per cent. during July, 8·23 per cent. during January, 8·10 per cent. during December, 8·03 per cent. during September, 7·77 per cent. during November, and 7·27 per cent. during February.

The birth-rate for each ten thousand of the population as estimated in the following European States is, for the present year, 377 in Hungary, 368 in Prussia, 362 in Austria and in the German Empire, 338 in Italy, 319 in the Netherlands, 305 in Denmark, 303 in Norway, 294 in Switzerland, 286 in Belgium, and 221 in France.

MARRIAGES.

32,112 marriages were registered in Scotland during 1898, giving a marriage rate of 75·56 in every ten thousand of the population. The mean average rate for the last ten years (1888-1897) is 69 per ten thousand.

TABLE VIII.—Births, 1898. Number of Legitimate, Illegitimate, and Total Births in Scotland, and its Five Groups of Districts, distinguishing the Sexes. Also the number of Twin and Triplet Births.

Table VI. indicates how the marriage rate varies in the different districts, &c., into which Scotland is divided; thus, in the Principal Town Districts the rate per ten thousand of the inhabitants of the same is 92·76; in the Large Town Districts it is 74·96; in the Small Town Districts it is 69·79; in the Mainland Rural Districts it is 54·23; and in the Insular Rural Districts it is 33·60—ratios which, when compared with the corresponding of last year, show an increase in each district except in the Insular Rural District, where the reverse holds. In the counties also the rate varies greatly, the highest—89·05 per ten thousand of the inhabitants—occurring in Edinburgh, the lowest—30·73—in Sutherland. The rate in four counties exceeds that for Scotland, viz.:—in Aberdeen, where it is 78·66; in Renfrew, 80·18; in Lanark, 88·83; and in Edinburgh, 89·05. The counties in which the marriage rate is lowest are—Ross and Cromarty, with one of 45·96; Orkney, 45·80; Bute, 45·47; Argyll, 41·26; Shetland, 40·46; and Sutherland, 30·73 per ten thousand. Table V. gives the corresponding rates in each of the Principal Towns, that in Glasgow being 98·0; in Edinburgh, 98·7; in Dundee, 78·1; in Aberdeen, 97·4; in Govan and Partick, 73·0; in Leith, 81·5; in Paisley, 92·3; in Greenock, 86·5; in Coatbridge, 80·9; in Perth, 99·9; and in Kilmarnock, 92·8.

The fertility of each marriage is calculated in the usual manner—the legitimate births registered during the year under review being divided by the marriages of a former year—on this occasion 1892; so that $\frac{121,991}{23,670}$ gives 4·26 as the average fertility of each marriage, or 426 children were born to every 100 marriages.

Tables X., XI., and XII. afford some information regarding the number and proportion of marriages as performed in Scotland and in each of its five great Registration Districts under various religious denominations. Thus, of the whole 32,112 marriages, the ceremony in 14,567 was performed by clergy of the Established Church, in 6033 by those of the Free Church, in 3486 by those of the United Presbyterian Church, in 3091 by those of the Roman Catholic Church, in 949 by those of the Episcopal Church, in 2418 by those of other denominations, while 1568 of the marriages were irregular, being performed without proclamation of purpose and without reference to the intervention of religious ceremony. In other words, 45·36 per cent. of the total marriages are in accordance with the usages of the Established Church, 18·79 per cent. with those of

be noted in Aberdeen, 3·69 per cent., in Kincardine 3·78 per cent., in Edinburgh 5·66 per cent., and in Forfar 6·58 per cent.; least so in Ross and Cromarty, 0·84 per cent., in Elgin 0·66 per cent., and in Wigtown 0·52 per cent., there being none in Shetland, Orkney, Caithness, Sutherland, Nairn, Kinross, Bute, and Peebles. Ceremonies as performed by clergymen of other denominations than the above are most marked in Renfrew, 9·61 per cent., in Lanark 10·57 per cent., and in Selkirk 11·81 per cent.; least so in Haddington, 0·85 per cent., there being none in Kinross. Irregular marriages bulk most largely in Lanark, where 8·90 per cent. of the whole come under this heading, and in Edinburgh 9·03 per cent., being in lowest proportion in Linlithgow with 0·47 per cent., Dumbarton with 0·44 per cent., Haddington with 0·43 per cent., and Roxburgh with 0·34 per cent.; there are none in Shetland, Sutherland, Ross and Cromarty, Nairn, Kincardine, Kinross, Clackmannan, Argyll, Berwick, Peebles, Selkirk, Kirkcudbright, and Wigtown.

In the case of the Towns—in Aberdeen and in Leith over 50·00 per cent. of the marriages during the year were performed by ministers of the Established Church, the lowest rates occurring in Dundee, 35·02 per cent., in Govan and Partick 32·87 per cent., in Paisley 32·71 per cent., and in Coatbridge 22·58 per cent. Marriages by clergymen of the Free Church are in largest ratio in Perth, 19·61 per cent., in Kilmarnock 19·79 per cent., in Aberdeen 20·32 per cent., and in Paisley 22·81 per cent.; least so in Glasgow, 14·88 per cent., and in Leith 13·51 per cent. The United Presbyterian Church is best represented in Leith with 14·31 per cent., in Paisley with 14·78 per cent., and in Coatbridge with 15·06 per cent.; least so in Dundee with 9·57 per cent., in Greenock with 5·10 per cent., and in Aberdeen with 4·75 per cent. Marriages as performed by clergy of the

Tables XIII. and XIV. afford some information as to the ages at which marriage was effected in Scotland, as of the total 32,112 ceremonies the age of each of the contracting parties was given in all except in the case of four of the husbands and of three of the wives. Of the male spouses, 1917, or 5·97 per cent., and of the female 5916, or 18·42 per cent., were under 21 years of age at marriage, 26 of the former being under 18 years, while 6 of the latter were between 15 and 16 years, and 51 were between 16 and 17 years. On the other hand, 31 of the husbands were over 70 years of age, none of the brides having attained a greater age than 70. Table XIV. gives the proportions of marriages at various ages in Scotland and in each of its Primary Registration Districts: thus in Scotland 2·45 per cent. of the husbands and 10·68 per cent. of the wives were under 20 years of age at marriage, ratios exceeded in the case of both in the Principal Town Districts and of the wives in the Large Town Districts. Between 20-25 years, 34·40

At ages over 50 years, 2·48 per cent. of the husbands and 0·82 per cent. of the wives married throughout Scotland, proportions exceeded in the case of both sexes in the Principal Town Districts, and of the men in the Insular-Rural Districts.

During the year 28,371 bachelors espoused spinsters, 761 bachelors united with widows, 2153 widowers married spinsters, and 819 widowers did likewise with widows; or 88·35 in every hundred of the marriages were between bachelors and spinsters, 2·37 between bachelors and widows, 6·70 between widowers and spinsters, and 2·55 between widowers and widows.

From Table XVIII. an indication may be obtained as to the amount of elementary education possessed by those who married during the year, inasmuch as the proportions of husbands and wives who signed their marriage register, or who in lieu thereof made use of *mark*, is given for Scotland and the different districts, divisions, and counties, which, when compared with similar Tables for former years, shows a steady and decided improvement. During the year under review, 98·18 per cent. of the men who married and 96·99 per cent. of the women who married wrote their names on the register, leaving 1·82 per cent. of the former and 3·01 per cent. of the latter who made use of their *mark* instead. Those ratios vary in the different groups of districts, there being in the Principal Town Districts 1·97 per cent. of the husbands who used *mark*, 3·29 per cent. of the wives doing likewise; in the Large Town Districts the corresponding proportions are 2·02 per cent. and 2·80 per cent.; in the Small Town Districts they are 1·62 per cent. and 2·62 per cent.; in the Mainland-Rural Districts they are 1·05 per cent. and 1·21 per cent.; and in the Insular-Rural Districts 6·60 per cent. of the bridegrooms and 21·76 per cent. of the brides were apparently unable to write their names.

In ten of the counties the husbands made use of *mark* in greater proportion than was the case for all Scotland, the wives in eight counties doing the same. The counties in which the former fail are Sutherland, Ross and Cromarty, Inverness, Stirling, Dumbarton, Argyll, Bute, Renfrew, Lanark, and Peebles; those in which the latter fail are Shetland, Sutherland, Ross and Cromarty, Inverness, Dumbarton, Argyll, Renfrew, and Lanark. In Kinross, Selkirk, and Kirkcudbright the whole of both brides and bridegrooms signed their names, the former in Orkney and Nairn and the latter in Clackmannan doing the same. In the two lower lines of the Table the cities of Edinburgh and Glasgow are compared in the same way. In the former, 99·42 per cent. of the men and 99·28 per cent. of the women wrote, leaving 0·58 per cent. of the first and 0·72 per cent. of the second to use *mark*; and in Glasgow the corresponding rates are 97·14 per cent. and 2·86 per cent. for the men, and 95·07 per cent. and 4·93 per cent. for the women.

15·20 per cent. of the marriages were registered during the month of June, 13·67 per cent. during December, 12·60 per cent. during January, 11·78 per cent. during July, 6·90 per cent. during April, 6·85 per cent. during October, 6·70 per cent. during November, 6·61 per cent. during August, 6·24 per cent. during September, 5·13 per cent. during March, 4·99 per cent. during February, and 3·33 per cent. during May.

The marriage rate per ten thousand of estimated population in the undernoted European States during 1898 is as follows:—70 in Norway and in Italy, 73 in the Netherlands, 75 in France, 76 in Denmark, 79 in Austria, 80 in Switzerland, 83 in Hungary and in Belgium, and 85 in the German Empire and in Prussia.

DEATHS.

During the year 1898 there were 78,397 deaths registered throughout Scotland, which gives a mortality rate of 184 in every ten thousand of the population as estimated, or one death in every 54 of the inhabitants. Of these, 39,344 are of the male sex, and 39,053 of the female. On comparing the number of deaths during the present year with that of the preceding year the former are found to be fewer by 747. The mortality rate among the males alone is 192 in every ten thousand, and among the females 178. The mean death-rate for the last ten years is 188 per ten thousand of the population.

Tables XIX. and XX., and also Table VI., give the number of deaths and the mortality rate in each of the five great Registration Districts. The former Table shows the number of deaths registered in the Principal Town Districts to be 35,367, the rate as shown in the latter being 202 in every ten thousand of the inhabitants of the same; the male deaths number 17,941, and the female

TABLE XIX.—Deaths of Males and Females in Scotland, and its Five Groups of Districts, during each of the Years 1855-1898.

17,426. In the Large Town Districts the deaths total to 10,729, equivalent to 189 in every ten thousand of the inhabitants, the males being 5385, and the females 5344. In the Small Town Districts the deaths are 15,611, and the rate 174 per ten thousand of population, males numbering 7681, and females 7930. In the Mainland-Rural Districts the deaths amount to 14,859, at a rate of 163 per ten thousand of the inhabitants of the same, the male deaths being 7448, and the female 7411; and in the Insular-Rural Districts the deaths number 1831 in all, giving a rate of 150 in every ten thousand of the population, the male deaths being 889, and the female 942. On comparing the total Urban with the total Rural rate the former is found to be 192 and the latter 161 in every ten thousand of the respective populations. Tables XXI. and XXII. show the number of deaths and their percentage to the population in each of the Principal Towns of Scotland. In Glasgow 15,328 deaths were registered during the year, being at the rate of 21·2 per thousand of its inhabitants; in Edinburgh the deaths are 5798, the rate 19·6 per thousand of its popu-

lation; in Dundee the deaths are 3455, the rate being 21·0; in Aberdeen the deaths are 2683, the rate 19·1; in Govan and Partick they total to 1957, the rate being 16·7; in Leith they amount to 1364, and the rate 17·9; in Paisley they are 1584 in number, and in rate 21·0; in Greenock they are 1308 and 21·4 respectively; in Coatbridge they are 700, the rate being 20·3; in Perth they are 628 and 20·5; and in Kilmarnock the registered deaths are 562, the mortality rate being 18·4 per thousand of the inhabitants.

Tables XXIII. and XXIV. give the number of deaths of both sexes in Scotland, and in each of the Primary Registration Districts at a series of ages, with the proportion of them to the numbers presumably alive at the same ages. Thus, of children under one year of age 16·842 per cent. of the males and 14·017 per cent. of the females died throughout Scotland during the year, a rate exceeded, and that in the case of both sexes, in the Principal and Large Town Districts, the lowest rates being 8·689 per cent. and 7·654 per cent. for the respective sexes in the Insular-Rural Districts. In each district the male rate is higher than that of the female.

Under two years of age the death-rate for the males in Scotland is 6·154 per cent., and for the females 5·632 per cent., ratios exceeded, and for both sexes, in the Principal and Large Town Districts, the lowest rates being

2·067 per cent. and 2·159 per cent. in the Insular-Rural Districts. In each district, except the Insular-Rural, the male rate is above that for the female.

Under three years of age the death-rate among the males in Scotland is 2·128 per cent., and among the females 2·138 per cent., exceeded, and for both sexes, in the Principal and Large Town Districts, the lowest rates—0·936 and 0·777 per cents.—falling in the Insular-Rural Districts. In the Small Town Districts the female death-rate at this age is above the male.

Under four years of age the rate for the males is 1·139 per cent., and for the females 1·194 per cent., exceeded in the case of both in the Principal and Large Town Districts, the lowest rates occurring in the Mainland-Rural Districts, of 0·720 per cent. and 0·657 per cent. In the Principal Town Districts, Large Town Districts, Small Town Districts, and Insular-Rural Districts the female death-rate is higher than the male.

Under five years of age the rate for the respective sexes in Scotland is 0·848 per cent. and 0·989 per cent., exceeded in the Principal and Large Town Districts in both cases. In every district, with the exception of the Large Town Districts, the female rate is higher than the male.

At all ages under five years the male mortality rate is 5·609 per cent. and the female 4·930 per cent. of the children presumably alive throughout Scotland of the same age. Between five and ten years the rates have fallen to 0·421 per cent. and 0·491 per cent. for the respective sexes. And they have reached their minimum during the next quinquennial period of 0·286 per cent. for the boys and 0·318 per cent. for the girls throughout Scotland, rates somewhat exceeded in the case of both in the Principal Town Districts, and of the females in the Large Town and Insular-Rural Districts. In each district the female mortality rate at this age is above that of the male. Between 15-20 years the rate for Scotland in the case of the males is 0·503 per cent., and of the females 0·488 per cent., ratios exceeded in the case of both sexes in the Small Town Districts, of the males in the Principal Town and Insular-Rural Districts, and of the females in the Mainland-Rural

Districts. In the Mainland-Rural Districts alone is the female death-rate greater than the male. Between 20-30 years the male rate for the whole country is 0·745 per cent., and the female 0·649 per cent., proportions exceeded as to both sexes in the Principal Town and Insular-Rural Districts, and by the females in the Large Town Districts. From 30 years upward the rate increases more rapidly, and that in each district and for both sexes. The male death-rate for Scotland at all ages is 192 for the male sex and 178 for the female per ten thousand of their respective numbers. In the

TABLE XXV.—Percentage of Deaths at each Age to the Total Deaths in 1898.

[illegible]

the population estimated to be alive at these same ages. Thus, the highest mortality rate under 1 year occurred in Dundee where 20·93 per cent. of the infants presumably alive at this early age succumbed during the year, followed by Coatbridge with 19·90 per cent., Aberdeen with 19·65 per cent., Glasgow with 18·29 per cent., Govan and Partick with 17·49 per cent., Greenock with 17·32 per cent., Edinburgh with 17·08 per cent., Paisley with 16·74 per cent., Leith with 16·67 per cent., Perth with 16·54 per cent., and Kilmarnock with 14·59 per cent. During the second year of life the greatest mortality rate was in Dundee, 8·92 per cent., followed by Glasgow with one of 8·72 per cent., Paisley with one of 7·92 per cent., Govan and Partick with one of 7·80 per cent., Coatbridge with one of 7·47 per cent., Greenock with one of 6·64 per cent., Edinburgh with one of 6·55 per cent., Aberdeen with one of 6·53 per cent., Kilmarnock with one of 6·11 per cent., Leith with one of 5·97 per cent., and Perth with one of 4·20 per cent. At all ages under 5 years the death-rate to the population at the same age was 7·53 per cent. in Dundee, 7·17 per cent. in Coatbridge, 7·11 per cent. in Glasgow, 6·40 per cent. in Greenock, 6·31 per cent. in Govan and Partick, 6·27 per cent. in Aberdeen, 6·20 per cent. in Paisley, 5·90 per cent. in Edinburgh, 5·56 per cent. in Leith, 5·09 per cent. in Kilmarnock, and 4·87 per cent. in Perth.

Table XXV. shows the percentage of deaths at various ages to the total deaths in Scotland and in each of the five great districts. In Scotland the mortality among male infants under one year of age formed 24·76 per cent. of the total deaths at all ages, among females it was 20·03 per cent., exceeded as to both sexes in the Principal and Large Town Districts, and by the males in the Small Town Districts. At all ages under 5 years the male rate throughout the country is 38·39 per cent., the female 32·96 per cent., that in the towns generally being much above the same in the country districts.

The death-rate per ten thousand of the estimated population of the undernoted European States during the year is as follows:—279 in Hungary, 249 in Austria, 231 in Italy, 212 in France, 206 in the German Empire, 201 in Prussia, 189 in Switzerland, 176 in Belgium, 170 in the Netherlands, 156 in Denmark, and 152 in Norway.

CAUSES OF DEATH.

Of the 78,397 deaths registered throughout Scotland during the year, 616 were so ill defined, or specified in such a manner as to be no use for statistical purposes.

The mortality rate for Scotland, both sexes combined, is for the year, 1845 in every hundred thousand of the population as estimated,—the male rate 1916 and the female 1778,—being in each case considerably under the same for last year.

The number of deaths registered throughout Scotland from Zymotic diseases during 1898 is 11,736, which is in the ratio of 278 for every hundred thousand of the population and equal to 15·09 per cent. of the total mortality. The incidence of such diseases was much more marked in the Urban than in Rural Districts, the highest rate occurring in the Principal Town Districts, the lowest in the Insular-Rural Districts. In the Large Town Districts, Small Town Districts, and Mainland-Rural Districts the rate for the present year is above that for last—1897. (Tables XXVIII. and XXIX.)

Table XXXII. is so arranged as to show the number and proportion of deaths from Zymotics at a series of ages, five in number. The total number of deaths from such diseases is 11,736, a larger number than during any year since 1893. Of those, 7781 occurred during the first five years of life, 705 between the ages of five and ten years, 202 between ten and fifteen years, 1890 between fifteen and sixty years, and 1158 at greater ages than this—the proportions corresponding to these being 66·3 per cent. during the earliest years of life, 6·0 per cent. during the second five years, 1·7 per cent.

between 10-15 years, and 30 or 1·4 per cent. at greater ages, one being over 60. Scarlet Fever caused 909 deaths, 544 or 59·9 per cent. of them between birth and the fifth birthday, 224 or 24·6 per cent. during the second quinquennial period of life, 52 or 5·7 per cent. between 10-15 years, 88 or 9·7 per cent. between 15 and 60 years, and one at a greater age. Hooping Cough accounts for 2476 registrations, 2370 or 95·7 per cent. of them during the first period of life—0·5 years, 99 or 4·0 per cent. between 5-10 years, and 7 or 0·3 per cent. between 10-15 years. Influenza is the cause of 1291 deaths, 115 or 8·9 per cent. of them during the first five years of life, 14 or 1·1 per cent. between 5-10, as also between 10-15 years, 437 or 33·8 per cent. between 15-60 years, and 711 or 55·1 per cent. at ages above 60. Diphtheria caused 661 exits, 494 or 74·7 per cent. during the first five years, 119 or 18·0 per cent. during the following quinquennial period, 18 or 2·7 per cent. between 10-15 years, 27 or 4·1 per cent. between 15-60 years, and 3 or 0·5 per cent. at greater ages. To Fevers 902 deaths are ascribed, 43 or 4·8 per cent. of them between birth and the end of the fourth year, 64

or 7.1 per cent. between 5-10 years, 89 or 9.9 per cent. between 10-15 years, 677 or 75.0 per cent. between 15-60 years, and 29 or 3.2 per cent. at ages over this. Of these, Typhus caused 63 deaths, 57 of them between 15-60 years of age. Enteric or Typhoid caused 814 deaths, 34 or 4.2 per cent. during the first five years of life, 59 or 7.3 per cent. between 5-10 years, 85 or 10.4 per cent. between 10-15 years, 614 or 75.4 per cent. between 15-60 years, and 22 or 2.7 per cent. at ages beyond this. Relapsing and Cerebro-Spinal Fever each caused 2 deaths, and Simple or Ill-defined 21. Diarrhoea and Dysentery caused 2271 deaths in all, 1732 or 76.3 per cent. of them between birth and the beginning of the fifth year, 30 or 1.3 per cent. between 5-15 years, 192 or 8.4 per cent. between 15-60 years, and 317 or 14.0 per cent. at over 60. Syphilis caused 229 deaths, 186 of them or 81.2 per cent. during the first quinquennial period of life. Erysipelas caused 177 deaths, 62 or 35.0 per cent. during the first period, 59 or 33.4 per cent. between 15-60 years, and 52 or 29.4 per cent. at a more advanced age. Puerperal Fever caused 227 deaths during the years of child-bearing. The deaths from Croup may also be noted, viz.:—189 in all, of which 175 or 92.6 per cent. are recorded as during the first five years of life, and 13 during the second.

Zymotic disease in Scotland is the ascribed cause of death to 278 individuals in every hundred thousand of the inhabitants as estimated, and equal to 15·09 per cent. of the total mortality. In the Principal Town Districts the rate per hundred thousand of the population is 323, or 15·99 per cent. of all the deaths; in the Large Town Districts the corresponding ratios are 302, and 15·98 per cent.; in the Small Town Districts they are 274, and 15·70 per cent.; in the Mainland-Rural Districts they are 195, and 11·98 per cent.; and in the Insular-Rural Districts they are 183 to population, and 12·14 per cent. to deaths.

Tables XXX. and XXXI. indicate the mortality rate from Zymotics in the Principal Towns. Thus in Glasgow this class of disease is the cause of 357 deaths in every hundred thousand of its estimated population, equal to 16·89 per cent. of the total deaths. Hooping Cough is accountable for 98 of the former proportion, Measles for 75, Diarrhoea and Dysentery for 67, Fevers for 32 (31 of those being Enteric and 1 Typhus), Scarlet Fever for 26, and Influenza and Diphtheria each for 15.

In Edinburgh, 275 persons per hundred thousand of the population succumbed to Zymotics during the year, or 14·01 per cent. of the deaths were of this nature. To Diarrhoeal Affections 58 of the former ratio are due, to Measles 48, to Hooping Cough 44, to Influenza 40, to Scarlet Fever 30, and to Diphtheria and Fevers each 15 (11 of the latter Enteric or Typhoid and 3 Typhus).

In Dundee, 347 per hundred thousand of the population died from Zymotics, equal to 16·42 in every hundred of the total deaths. Diarrhoea and Dysentery accounted for 93 of this, Measles for 85, Hooping Cough for 55, Scarlet Fever for 27, Influenza for 24, Diphtheria for 18, and Fever for 10 (5 of those Enteric and 4 Typhus).

In Aberdeen, Zymotics caused 264 deaths in every hundred thousand of

the inhabitants as estimated, equal to 13·80 per cent. of the total mortality. To Hooping Cough 75 of the former is due, to Diarrhoeal Affections 56, to Scarlet Fever 27, to Influenza 25, to Diphtheria 24, to Measles 15, and to Fevers 11 (10 Typhoid and 1 Typhus).

In Govan and Partick, 304 deaths per hundred thousand of the population were so caused, or 18·21 per cent. of the total mortality. Hooping Cough is the ascribed cause of 95 of this, Diarrhoea and Dysentery of 72, Measles of 62, Fevers of 16 (all Enteric), Scarlet Fever and Diphtheria each of 11, and Influenza of 9.

In Leith, the proportion to the population as above is 211, or 11·82 per cent. of all deaths. For 80 of the former ratio Diarrhoea and Dysentery is responsible, for 35 Measles, for 24 Hooping Cough, for 13 Diphtheria, for 12 Influenza, for 11 Fevers (all Typhoid or Enteric), for 8 Scarlet Fever, and for 1 Small-pox.

In Paisley, 400 deaths from Zymotics in every hundred thousand of the population occurred during the year, equal to 19·09 per cent. of the total deaths. To Hooping Cough 133 are due, to Diarrhoea and Dysentery 93, to Fevers 58 (54 Enteric, 1 Typhus, and 3 Simple or Ill-defined), to Measles 46, to Influenza 34, to Diphtheria 17, and to Scarlet Fever 8.

In Greenock, the mortality rate from the same is 344 per hundred thousand of population, and 16·08 per cent. of the total deaths. 97 of the former are due to Diarrhoeal Affections, 64 to Hooping Cough, 39 to Scarlet Fever, 38 to Fevers (of these 35 being Enteric), 28 to Diphtheria, and 18 to Measles, and to Influenza.

In Coatbridge, 366 in every hundred thousand died from those diseases, equivalent to 18·06 per cent. of all the deaths. 157 of them are due to Measles, 64 to Diarrhoea and Dysentery, 52 to Hooping Cough, 44 to Fevers (41 Enteric and 3 Simple or Ill-defined), and 12 to Scarlet Fever, to Influenza, and to Diphtheria.

In Perth, the proportion to population is 223, the percentage of the total mortality being 10·90. Of the former, 49 are ascribed to Diarrhoea and Dysentery, 33 to Hooping Cough, 30 to Scarlet Fever, 26 to Influenza, 20 to Measles, 13 to Diphtheria, and 10 to Fevers (all Typhoid).

In Kilmarnock, 305 deaths per hundred thousand of population, or 16·55 per cent. of the total deaths, are due to Zymotics. To Diarrhoea and Dysentery 59 of the former are ascribed, to Scarlet Fever, and to Fevers 56 (the latter all Enteric), to Measles 49, to Influenza 33, to Diphtheria 20, and to Hooping Cough 10.

But 2 deaths from Small-pox were registered throughout Scotland during 1898. Both were females, one *æt.* 17, the other 64 years.

Measles caused 2290 deaths during the year and is at the rate of 54 in every hundred thousand of the population, forming 2·94 per cent. of the total mortality. Of those, 1180 are males and 1110 females. In each of the three Urban Districts the death-rate from Measles is above that for Scotland, the highest, 82, occurring in the Large Town Districts. The lowest rate, 14, falls to the Insular-Rural Districts.

From Scarlet Fever there are 909 deaths, affording a rate of 22 per hundred thousand of population, and 1·17 per cent. of the specified deaths. Of those, 435 are males and 474 females. Here again the Town Districts show the highest rates, that in the Principal Town Districts being 25, in the Large Town Districts 22, and in the Small Town Districts 24 to the inhabitants as above. The lowest rate, 4, occurs in the Insular-Rural Districts.

To Influenza 1291 deaths are ascribed, giving a rate of 31 in every hundred thousand of the population, and 1·66 per cent. of all the deaths:

in the Mainland-Rural, and 46 in the Insular-Rural Districts, the lowest rate, 22, falling in the Principal Town Districts.

Hooping Cough is the cause of 2476 deaths, giving a death-rate of 59 per hundred thousand of the population, and forming 3·18 per cent. of the total mortality in Scotland: the males number 1073, the females 1403. The highest death-rate from this disease occurs in the Principal Town Districts, 76, and in the Large Town Districts, 60, the others being 53 in the Small Town Districts, 31 in the Mainland-Rural Districts, and 55 in the Insular-Rural Districts.

Diphtheria is the cause of 661 deaths, at the rate of 16 per hundred thousand of population, or 0·85 per cent. of all the specified deaths: of those 328 are males and 333 females. There is no marked difference in the death-rate from this disease in the different districts, there being 16 in the

Principal Town Districts, 17 in the Large Town Districts, 16 in the Small Town Districts, 14 in the Mainland-Rural Districts, and 15 in the Insular-Rural Districts.

Continued Fevers together caused 902 deaths, equal to 21 per hundred thousand of population, or 1·16 per cent. of the total deaths: males 493, females 409. The highest rate, 25, occurs in the Principal Town Districts; the lowest, 15, in the Mainland-Rural Districts. Of those Fevers, Typhus caused 63 deaths in Scotland. Enteric or Typhoid caused 814 (males 448, females 366), giving a death-rate of 19 per hundred thousand, or 1·05 per cent. of all deaths. Relapsing Fever caused 2 deaths, as also did Cerebro-Spinal, and Simple or Ill-defined Fever caused 21. Table XXXVII. indicates how 127 of the deaths from Enteric Fever were registered in the Rural Districts, forming 78·88 per cent. of the total fever mortality in the same, while 687 or 92·71 per cent. are the corresponding in the Town Districts. Typhus caused 28 deaths in the Rural Districts, 35 in the Urban. To Diarrhoea and Dysentery together are ascribed 2271 deaths, giving a mortality rate of 54 in every hundred thousand of the population, or 2·92 per cent. of all specified deaths: males 1172, females 1099. The rate to population as above is in the different districts as follows:—70 in the Principal Town Districts, 59 in the Large Town Districts, 49 in the Small Town Districts, 30 in the Mainland-Rural Districts, and 14 in the Insular-Rural Districts.

From Rheumatism 419 deaths occurred, equal to 10 in every hundred thousand of the inhabitants (males 181, females 238) and apparently most marked in the Rural Districts.

To Cancer 3453 deaths are ascribed during the year throughout Scotland, being at the rate of 82 per hundred thousand of population (male rate 65,

female 98), and equivalent to 4.44 per cent. of all deaths. The highest rate 95 occurs in the Mainland-Rural Districts, followed by the Principal Town Districts with a rate of 82, the Small Town Districts with one of 76, the Large Town Districts with one of 75, and the Insular-Rural Districts with one of 63. The rates in the Principal Towns are to be found on Tables XXX. and XXXI., from the former of which it is seen that of every hundred thousand living in Edinburgh there were 120 deaths from Cancer, in Dundee the ratio is 97, in Kilmarnock it is 85, in Aberdeen it is 84, in Paisley it is 81, in Perth it is 76, in Glasgow it is 73, in Coatbridge it is 67, in Leith and in Greenock it is 63, and in Govan and Partick it is 44.

From diseases of a Tubercular nature there are 10,140 deaths during the year, males 5119, females 5021, together giving a mortality rate of 240 in every hundred thousand* of estimated population, and equivalent to 13.04 per cent. of the total specified deaths. The highest rates occur in the Urban Districts, being to population 277 in the Principal Town Districts, 258 in the Large Town Districts, 217 in the Small Town Districts, 191 in the Mainland-Rural Districts, and 183 in the Insular-Rural Districts. Of this class of disease Phthisis is the cause of by far the largest number of deaths, those for the present year being 7090, males 3557, females 3533, together equal to a death-rate of 168 per hundred thousand of population, and forming 9.12 per cent. of the total deaths. The deaths from Phthisis or Consumption were registered in each of the five districts per hundred thousand of their respective populations as follows:—In the Principal Town Districts the rate is 188, in the Large Town Districts 178, in the Small Town Districts 151, in the Mainland-Rural Districts 143, and in the

Insular-Rural Districts 158. Of the males who succumbed to Consumption 8·2 per cent. were under 15 years of age, 68·6 per cent. were between 15–45 years, and 23·2 per cent. were over 45; the corresponding proportions among the females being 12·1 per cent., 72·4 per cent., and 15·5 per cent. The death-rate from Phthisis in the Principal Towns to their population as estimated is 209 in Greenock, 206 in Dundee, 198 in Leith, 197 in Glasgow, 188 in Paisley, 186 in Edinburgh, 184 in Perth, 174 in Coatbridge, 171 in Aberdeen, 164 in Kilmarnock, and 126 in Govan and Partick. *Tabes Mesenterica* caused 947 deaths throughout Scotland during the year—males 491,

-	-	-	-	-	-	-	-	-	-	-	1

inhabitants, and forms 11·60 per cent. of the total deaths; the males number 4539, the females 4487. The highest rates are in the Principal Town Districts, 225, and Large Town Districts, 229—both above that for Scotland. The lowest rate, 161 per hundred thousand, occurs in the Insular-Rural Districts. In the Principal Towns the equivalent mortality from such diseases to the population is 315 in Perth, 286 in Greenock, 261 in Paisley, 237 in Aberdeen, 229 in Glasgow, 226 in Edinburgh, 224 in Coatbridge, 197 in Dundee, 194 in Govan and Partick, 185 in Leith, and 148 in Kilmarnock. Among diseases of the Nervous System, Apoplexy caused 3148 deaths—males 1435, females 1713; Paralysis caused 1573—males 740, females 833; Epilepsy 224—males 120, females 104; and Convulsions is the ascribed cause of 1195—males 683, females 512.

Diseases of the Circulatory Organs ended the lives of 7070 individuals, being at the rate of 168 per hundred thousand of the population, and forming 9·09 per cent. of all deaths—males 3353, females 3717. In the Mainland-Rural Districts alone is the rate—179—above that for Scotland, and the lowest rate falls in the Insular-Rural Districts—viz., of 115. In the Principal and Small Town Districts the rate is 167, and in the Large Town Districts 164. As to the Towns, the highest rate to population is in Edinburgh, 209, followed by Greenock and Perth each 204, Dundee 191, Aberdeen 169, Leith 160, Kilmarnock 157, Glasgow 156, Paisley 152, Coatbridge 105, and Govan and Partick 102.

Diseases of the Respiratory Organs account for 13,206 deaths, at the rate of 313 per hundred thousand of population, and 16·98 per cent. of all deaths—males 6980, females 6226. The rates in the Principal and Large Town Districts—382 and 319 respectively—are above that for Scotland, in the others being below it—viz., 265 in the Small Town Districts, 234 in the Mainland-Rural Districts, and 232 in the Insular-Rural Districts. They appear in much the same order when the proportion is taken in connection with the total deaths; thus, in Scotland 16·98 per cent. of all the deaths are caused by diseases of the Respiratory Organs: the percentage in the Principal Town Districts is 18·90, in the Large Town Districts 16·91, in the Small Town Districts 15·26, in the Mainland-Rural Districts 14·40, and in the Insular-Rural Districts 15·43. Bronchitis caused the death of 2817 males and 2972 females; Pneumonia of 3217 males and 2396 females; and Croup of 104 males and 85 females. Among the towns, the highest proportion of deaths from diseases of this nature to each hundred thousand of the inhabitants occurs in Glasgow, 429, followed by Dundee with a ratio of 419, Coatbridge with one of 410, Govan and Partick with one of 378, Greenock with one of 349, Perth with one of 339, Aberdeen with one of 338, Leith with one of 336, Paisley with one of 329, Edinburgh with one of 314, and Kilmarnock with one of 275.

From diseases of the Digestive System there are 6021 deaths, at a rate of 143 per hundred thousand of the population, and forming 7·74 per cent. of the total specified mortality—males 2981, females 3040. The rate in each of the three great Urban Registration Districts is higher than that for Scotland, the reverse being the case in the two Rural Districts—the highest rate—152 to population—occurring in the Small Town Districts, the lowest—98—in the Insular-Rural Districts. In the Principal Towns the rate per hundred thousand of their populations is 177 in Kilmarnock, 176 in Aberdeen, 168 in Paisley, 160 in Dundee, 151 in Glasgow, 146 in Leith, 140 in Edinburgh, 137 in Coatbridge, 135 in Perth, 120 in Greenock, and 119 in Govan and Partick. Enteritis caused 1988 deaths—1015 males

973 females; Peritonitis caused 772 deaths—males 384, females 388; Hernia caused 162 deaths—males 72, females 90; Liver Disease caused 793 deaths—males 418, females 375; Ileus, Stricture of the Intestine, and Intussusception together caused 409 deaths—males 211, females 198.

Diseases of the Urinary Organs caused 2024 deaths in Scotland during 1898, giving a mortality rate of 48 in every hundred thousand of its inhabitants, and forming 2·60 per cent. of the total deaths—males number 1175, females 849. In none of the five great registration districts does the rate from those diseases differ much from that for the country at large. Acute Nephritis caused 478 deaths, Bright's Disease 852, Calculus 27, Diseases of the Bladder and Prostate 391, and to other morbid conditions of the same system not mentioned above, 176 deaths are credited.

From diseases of the Organs of Reproduction or Generation 573 deaths occur, or 14 per hundred thousand of the population, and 0·74 per cent. of all deaths—males 25, females 548. Of those deaths 63 are due to Ovarian disease, and 105 to Uterine affections. Diseases incidental to Parturition, not including Puerperal Fever, to which latter 227 deaths are due, cause 351—together a total of 578.

From diseases of the Organs of Locomotion—bones and joints—there are 313 deaths, equal to 7 in every hundred thousand of the population and 0·40 per cent. of all the deaths—males 188, females 125.

To diseases of the Integumentary System 180 deaths are ascribed—males 96, females 84.

Developmental diseases, not including Old Age, are the cause of 2705 deaths—males 1560, females 1145. Of those, Premature Birth accounts for 2191, Atelectasis for 157, Cyanosis, Spina Bifida, and other congenital defects for 357.

To Old Age 3980 deaths are ascribed, affording a mortality rate of 94 in every hundred thousand of the population, and equivalent to 5·12 per cent. of the total deaths—males 1533, females 2447. Between the ages of 95 and 100 years 45 men and 84 women succumbed, while two of the former sex and 10 of the latter had attained the age of 100 years or over it. One of the men was a portioner and cowfeeder *aet.* 101; the other a shepherd who attained the patriarchal age of 109 years. Four of the women were 100 years of age at death—one the widow of a seaman, another the daughter of a farmer, the third the widow of a calico printer, and the fourth the widow of a forester. One woman was *aet.* 102, a pauper and widow of a joiner; one was *aet.* 103, a pauper, formerly a servant; two were *aet.* 104, one was *aet.* 105, and another *aet.* 109—the four latter all being widows.

From Violence there are 3186 deaths, a rate of 76 per hundred thousand of population (male rate 115, female rate 38), forming 4·10 per cent. of all deaths—males 2348, females 838. Those due to Violence other than Accident are 278—males 206, females 72—and of those 15 are Homicidal and 262 Suicidal—the male suicides being 198 and the female 64 in number. Accident or Negligence is the cause of 2908 deaths—males 2142, females 766. Of the Accidental deaths 154 occurred in Mines or Quarries—males 150, females 4; Railways are the cause of 236—males 229, females 7; and from accidents with other Vehicles than Railways and by Horses there are 159 deaths—males 138, females 21. Machinery accidents number 66—all males but 2. Accidental Drowning caused the death of 529 males and 62 females, and Suicidal Drowning ended the lives of 46 males and 20 females. From Burns and Scalds 337 deaths occurred—males

140, females 197; from Suffocation 356 died—males 178, females 178—and of those 190 occurred in bed to 86 males and 104 females. Seventy-five males and 39 females were accidentally poisoned, while 17 males and 3 females ended their own lives in a similar manner.

The poisons by which death was accidentally caused are:—Laudanum, in the case of 20 males and 12 females; Morphia, of 1 male; Chloroform, of 10 males and 7 females; Ether, of 1 female; Chloral Hydrate, of 1 male; Bromide of Potassium, of 1 female; Alcohol, of 12 males and 3 females; Carbolic Acid, of 3 males and 2 females; Coal Gas, of 1 male and 4 females; Carbonic Acid Gas, of 5 males and 1 female; Sulphur Fumes, of 1 male; Ammonia Vapour (Explosion in Ice Works), of 3 males; Strychnia, of 2 males; overdose of Antifebrine, of 1 male; Phosphorus, of 2 females; Lead, of 3 males; Oxalic Acid, of 1 male; Hydrocyanic Acid, of 1 male; overdose of Epsom Salts, of 1 female; Arsenic, of 1 male; Cyanide of Potassium, of 1 male; Santonin, of 1 female; an Irritant poison, of 1 female; Weed Killer, of 1 male; a Ptomaine, of 4 males and 2 females; Bite from an Adder, of 1 male; kind not stated, of 2 males and 1 female.

The poisons by which Suicide was effected were—Laudanum, by 9 males and 1 female; Morphia, by 1 male; Hydrocyanic Acid, by 2 males; Aconite and Belladonna, by 1 female; Carbolic Acid, by 2 males; Oxalic Acid, by 1 male and 1 female; Bichromate of Potash, by 1 male; the Poison not stated, by 1 male.

Table XXXIXa. shows the methods by which Suicide was accomplished in Scotland and in its groups of Districts, its Counties, and Principal Towns. Thus, of the 262 suicides, 6 males and 1 female effected their purpose on railways; 22 males and 1 female shot themselves; 44 males and 11 females cut or stabbed themselves to death; 9 males and 5 females threw themselves from a height; 46 males and 20 females drowned themselves; 54 males and 22 females hanged themselves; 17 males and 3 females took poison; and 1 female ended her life in some way not specifically mentioned. The suicides in the different Districts are as follow:—In the Principal Town Districts 88 males and 20 females took their own lives; in the Large Town Districts 32 males and 9 females did likewise; in the Small Town Districts 29 males and 16 females; in the Mainland-Rural Districts 44 males and 14 females; and in the Insular-Rural Districts 5 males and 5 females ended their own existence.

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of the year are the Notes made by Dr. Buchan, under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Quarterly Reports:—

The weather of *January* was characterised by a very high barometric pressure, accompanied with an unusually low monthly range; a mean temperature higher than any hitherto recorded for January, with nearly the average daily range of temperature; a very low mean humidity, the only lower mean being 79 in 1895; a rather small rainfall, falling on one day fewer than usual; and seven days excess above the average of S.W. winds, and blowing with a force considerably above the average.

The mean barometric pressure was 30·078 inches, being 0·298 inch above the average. Pressure was relatively much greater in the south than in the north, and a little greater in the west than in the east, resulting in an extraordinary prevalence of very strong west-south-westerly winds. In Wigtownshire the excess of pressure was 0·330 inch, whereas at North Unst it was only 0·143 inch. The mean temperature was 42°·9, or 5°·8 above the average, the excess being equally distributed between the days and the nights. The next highest mean January temperature since 1856 was 41°·2 in 1882, or 1°·7 lower than last January. For Edinburgh the mean was 44°·6, the next highest there for the past 134 years being 43°·8 in 1796, 42°·1 in 1846, and 42°·0 in 1882. This excess of temperature was decidedly greater at southern than at northern stations, and also at inland than at coast stations. The absolutely highest temperature was 60°·0, on the 19th, at Gordon Castle, and the lowest, 21°·5, on the 5th, at Dalnaspidal. These are unusually high maximum and minimum temperatures for the month; indeed as regards the minimum of 22°·5 no higher minimum temperature for all Scotland has been previously recorded. Another notable feature of the temperature is that at fourteen of the stations it did not fall below freezing. The mean rainfall was 3·14 inches, or 20 per cent. under the average. Its distribution over Scotland was extremely unequal. Thus everywhere south of the Grampians it was under the average, the amounts collected over large breadths varying from one-half to one-fourth part of the average. On the other hand the amounts were above the average on the south shore of the Moray Firth, along the Caledonian Canal from Inverness to Loch Linnhe, and in Orkney and Shetland, the great excess above the average being 100 per cent. at Deerness and 50 per cent. at Fort-William and Fort-Augustus. At the Ben Nevis Observatory 27·08 inches of rain fell, and the daily amounts twelve times exceeded an inch.

The weather in *February* was characterised by a very low mean barometric pressure, with a low monthly range; a mean temperature very little under the average, with a mean daily range nearly a degree above the average; an unusually low humidity, there having been previously only one lower, viz., 77 in 1895; a mean rainfall above the average, falling on three days more than the average; a very great excess of westerly winds, south-west being one day, west four days, and north-west two days in excess of the average; blowing with a mean strength greater than any previously recorded in February. The mean barometric pressure was 29·717 inches, or 0·136 inch under the average. It was 0·037 inch under the average at the Mull of Galloway, and 0·310 inch at North Unst; 0·073 inch at Skerryvore, and 0·161 inch at the Isle of May, being thus much more than the average in the north than in the south, and in the east than in the west. Hence very steep mean gradients were formed for very strong westerly winds. The mean temperature was 38°·2, or 0°·2 under the average, the days being 0°·2 above and the nights 0°·5 below the average. Its distribution was very unequal. It was under the average to the north of a line drawn from Skerryvore through Glencarron to Kinnaird Head, and thence at all strictly coast stations southward to the Tweed, the deficiency being, in general, about a degree. In all other parts of Scotland, temperature was above the average, the greatest excess, about 1°·5, being in the south-western counties. The absolutely highest was 59°·0 on the 1st at Duns Castle, and 52°·5 on the 24th at Braemar, the black-bulb being -1°·0 at Braemar on the same day. The mean rainfall was 3·90 inches,

or 27 per cent. above the average. On the eastern side of the watershed from Kinnaird Head to the Cheviots the rainfall was under the average, the greatest deficiency, fully half the average, occurring from the South Esk in Forfarshire to the Tweed. Everywhere else in Scotland, except at a very few isolated stations, it was above the average, and in many places in the north and west very largely so. Thus the percentages above the average were 175 at Stromness, 152 at Barrahead, 146 at Kirkwall, and more than double the average at Deerness, Thurso, Fearn, Fort-Agustus, and Turnberry Castle. At several stations the absolute amounts were very large, being 15·22 inches at Glenquoich, more than 10 inches at Lochbuie, Fort-William, and Glencarron; whilst at the Ben Nevis Observatory 30·09 inches were collected. At western stations the only generally fair days were from the 21st to the 24th, but at eastern stations, the number of rainless days was considerable.

The weather of *March* was characterised by a barometric pressure a little above the average, with a very low monthly range; a mean temperature very nearly the average, with a range considerably above it; a very low mean humidity; a mean rainfall somewhat less than the average, falling on one day more than the average; and a greater prevalence of northerly winds. The mean barometric pressure was 29·890 inches, being 0·064 inch above the average. The excess was greater at western and southern than at eastern and northern stations, resulting in a greater northing in the winds and a drier and clearer atmosphere. The mean temperature was 30°·6 or 0°·2 above the average, the days being 0°·6 above, but the nights 0°·2 under the average. To the north of a line from Wick to Stornoway, and to the south of a line from Ayr to Berwick, temperature was under the average—very slightly in the north, but in the south nearly a degree. But in the intermediate districts, which included nearly the whole of Scotland, temperature was above the average, the excess over considerable districts being fully a degree. The times of lowest temperature were the first week and the last week of the month. The absolutely highest temperature was 61°·0 on the 17th at Peterhead, and the lowest 8°·5 on the 8th at Braemar. The mean rainfall was 2·27 inches, or 19 per cent. under the average. The rainfall was under the average to the south of a line from Ardnamurchan to Kinnaird Head, but above it to the north of the same line, or over that part of Scotland most open to the northerly winds which prevailed. Over districts in the north-west the excess was above 50 per cent.; whereas over wide areas south of the Grampians the amounts collected generally were only from one-fourth to one-half the average. Heavy rains fell in the west Highlands from the 16th to the 18th, the amounts on these three days being 4·45 inches at Glencarron, 3·81 inches at Fort-William, and 3·95 inches at Corran. On the 18th, 6·09 inches fell at the Ben Nevis Observatory. The brilliant aurora of the 15th was very widely observed.

The weather of *April* was characterised by a rather low barometric pressure, with a particularly low monthly range; a high mean temperature, with a singularly small mean daily range; an average humidity; a mean rainfall greater than has been recorded in April since 1872, falling on five days in excess of the average; and seven days excess of winds from S.E., S., S.W., and W., blowing with a force much in excess of the average. The mean barometric pressure was 29·798 inches, or 0·095 inch under the average. The diminution of pressure from the average was much greater at western than at eastern stations. Thus it was 0·071 inch at Peterhead, whereas at Monach Lighthouse it amounted to 0·157 inch, a geographical distribution

which fully accounts for the extraordinary prevalence of southerly winds and high temperature noted above. The mean temperature was $45^{\circ}6$, or $1^{\circ}5$ above the average, the days being $0^{\circ}8$ and the nights $2^{\circ}3$ in excess. Thus the high temperature was principally occasioned not by any excess of sunshine, which was 48 hours under the average, but by the unwonted prevalence of winds from the warm south. The mean temperature but slightly exceeded the average at coast stations from the Firth of Tay to Kinnaird Head and in Shetland; whereas on the west side of the watershed and over the outlying Hebrides, temperature was from $2^{\circ}0$ to $3^{\circ}0$ above the average. The absolutely highest temperature was $70^{\circ}0$ on the 22nd, at Aberlour, and the lowest, $19^{\circ}0$, on the 5th, at Stobo. The mean rainfall was 3.61 inches, or 68 per cent. above the average. The rainfall was distributed over the country with very great irregularity. In comparatively restricted districts in Mid-Lothian, Galloway, and in the counties of Ayr, Inverness, and Elgin, it was under the average, the amounts at Ardwell and Inverness being respectively 40 and 33 per cent. under the average. On the other hand, the amount was well-nigh unprecedentedly large at the eastern stations situated between the lower reaches of the Tay and the Don, the excess above their averages being 200 per cent. at Lednathie, 220 per cent. at Montrose Asylum, and 308 per cent. at Johnstone Lodge, near Laurencekirk. This torrential rainfall, which was limited to the last four days of the month, fell with strong east-south-easterly winds. On these four days there fell at Johnstone Lodge 6.47 inches.

The weather of *May* was characterised by a rather low barometer, with one of the highest monthly ranges yet recorded for May; a mean temperature $1^{\circ}3$ under the average, with a mean daily range slightly under the average; a mean humidity nearly the average; a mean rainfall a little above the average, falling on two days more than the average; and five days excess of northerly and westerly winds. The mean barometric pressure was 29.830 inches, or 0.103 inch less than the average. Pressure was much more below the average at eastern and northern than at western and southern stations, the amount being 0.124 inch at Duns and 0.127 at North Unst, as compared with 0.088 inch at Dumfries and 0.066 inch at Monach. Gradients were thus formed for the great excess of north-westerly wind which prevailed. The mean temperature was $47^{\circ}7$, or $1^{\circ}3$ less than the average, the difference being nearly equally partitioned between the days and the nights. In the south-west, from the coast of Ayrshire to Skye, the mean temperature was nearly the average, but in the north and east and inland situations it was fully two degrees under the average at many places, the greatest deficiency being in the eastern parts of Inverness-shire and in the counties of Berwick, Roxburgh, and Peebles. The absolutely highest temperature was $74^{\circ}0$ on the 21st at Roshven, and the lowest, $22^{\circ}0$, on the 14th at Stobo. The mean rainfall was 2.62 inches, or 15 per cent. above the average. Its distribution among the stations was extremely irregular, being under the average in the counties of Berwick, Fife, the inland districts of Galloway, Lower Clydesdale, Western Perthshire, and the south of Inverness-shire. Elsewhere it was above the average. The greatest excess, fully double the average, was at Kirkwall, Deerness, Thurso, Dunrobin, Tarbetness, and Perth; and over large breadths bordering the Moray Firth, over the Outer Hebrides, south of Argyll, and in the counties of Ayr and Wigtown, the excess amounted to half the average. Comparatively little rain fell from the 6th to the 9th, and from the 18th to

the 27th. The hours of sunshine numbered 175, being only 12 hours short of the average.

The weather of *June* was characterised by a mean barometric pressure very little under the average, with a rather large monthly range; a mean temperature about half a degree under the average, with a mean daily range the average; the average mean humidity; a mean rainfall a little under average, falling on one day more than the average; and the direction of the wind closely approximate to the average. The mean barometric pressure was 29·927 inches, or 0·014 inch under the average, and the distribution of the pressure over the country was normal. The mean temperature was 54°·4, or 0°·4 under the average, this small deficiency being equally distributed between the days and the nights. Temperature was from half a degree to fully a degree under the average to the east of a line drawn from Kelso through Dundee to Aberlour, and to the north of a line drawn from this point through Inverness to North Unst. Over the rest of Scotland it exceeded the average, the excess at the more strictly inland stations rising to a degree. The absolutely highest temperature was 80°·0 on the 17th at Smeaton, and the lowest, 31°·0, on the 4th at Dalnaspidal. The mean rainfall was 2·32 inches, or 7 per cent. less than the average. Its distribution over Scotland was very irregular, being above the average in Shetland, Orkney, shores of the Pentland Firth, Outer Hebrides, the north-west of Argyll, and south-west of Ayrshire; but elsewhere it was under the average. The deficiency was about 50 per cent. over a wide district bounded on the west by a line drawn from Dundee through Kingussie to Cromarty. On the other hand, the greatest rainfall generally was in the Outer Hebrides, where it amounted to 53 per cent. at Monach. Very little rain fell from the 8th to the 16th, and from the 27th to the end of the month. The month was remarkable for a singular absence of heavy daily falls. Thunder is reported from 24 stations, giving an average of two for each station.

The weather of *July* was characterised by a mean barometric pressure very greatly in excess of the average, with a monthly range under it; a mean temperature a little less than the average, with a mean daily range very greatly above the average, having been in previous years exceeded only in 1868 and 1885, the range in these years being respectively 18°·2 and 17°·5; a mean humidity extraordinarily low, never having been observed lower during the past 43 years; a small rainfall, being less than half the average, falling only on 10 days, or five days fewer than the average; and a large excess of N.W. and N. winds. The mean barometric pressure was 30·055 inches, or 0·180 inch above the average, being one of the highest July means hitherto recorded. The excess was greatest in the south-west of the country, where it was 0·230 inch, and least in the north-east, where it was only 0·100 inch. This distribution of the pressure gave the excess of northerly winds which prevailed, bringing in their train a drier atmosphere, more sunshine, a temperature rather under the average, and a rainfall much less than the average both as regards amount and frequency. The mean temperature was 56°·5, or 0°·6 under the average, the days being 0°·4 above and the nights 1°·8 under it, the relatively higher temperature of the days being occasioned by the greater sunshine, and the lower temperature of the nights by the northerly winds together with the drier state of the air. In the extreme north the temperature was generally 2°·0 and in the extreme south 1°·0 under the average; whereas it was nearly half a degree above the average over the intermediate district bounded on the north by a line

drawn from Corran to Aberdeen and on the south by a line from Rothesay to North Berwick. The absolutely highest temperature was $83^{\circ}0$ on the 15th at Smeaton, and the lowest $32^{\circ}0$ on the 30th at North Esk Reservoir. The mean rainfall was 1.52 inch, or 52 per cent. under the average. This is one of the smallest rainfalls hitherto recorded for July, smaller amounts having been observed only in 1863, 1868, and 1878. In Orkney the average of the month was slightly exceeded, but over all other parts of the country it was under the average, the fall being less than a fourth part of the average over wide districts. The greater part of the rain fell from the 2nd to the 6th, 16th to the 18th, and 27th to the end of the month. Strong winds and storms were of rare occurrence, but the frequency of fog, chiefly in the west and north, was a marked feature of the meteorology of the month.

The weather of *August* was characterised by a mean barometric pressure a little higher than the average, with a monthly range slightly under the average; a mean temperature a little less than a degree above the average, with a mean daily range also a little above the average; a mean humidity less than the average; a mean rainfall a good deal above the average, falling on two days more than the average; the direction showed two days excess of west wind, the strength of the wind being nearly the average. The mean barometric pressure was 29.881 inches, or 0.030 inch above the average, with a range slightly less. The pressure was relatively higher at southern and eastern stations than at stations in the south and west, resulting in an excess of westerly winds. The mean temperature was $57^{\circ}3$, or $0^{\circ}7$ above the average, the days being $1^{\circ}1$ and the nights $0^{\circ}3$ in excess. The greatest excess, about $1^{\circ}5$, occurred in south-western districts, and the least in strictly inland situations. The excess was in most cases less at inland stations than near the coast. The absolutely highest temperature was $83^{\circ}0$ on the 12th at Smeaton; and the lowest $32^{\circ}3$ on the 25th at Braemar. The mean rainfall was 4.36 inches, or 20 per cent. above the average. The amount was very irregularly distributed among the stations. It was under the average to the east of a line drawn from Dunrobin to Fort-Augustus, Kingussie, Braemar, and Cupar, and in the counties of Berwick, Peebles, and Selkirk. The greatest deficiency, amounting to about one-third of the average, occurred at coast stations in the east. Everywhere else over the country the rainfall exceeded the average, that is at all places open to the westerly winds. The general excess varied from a fourth to half the average. The heaviest rains occurred during the first fortnight and last six days of the month, and from the 12th to the end of the month thunderstorms with accompanying heavy showers were of rather frequent occurrence.

The weather of *September* was characterised by a mean barometric pressure very much above the average, with an exceedingly small monthly range; a mean temperature unusually high, having been previously exceeded only by the warm Septembers of 1865, 1890, and 1895, accompanied with a mean daily range unusually large; a mean humidity only very slightly under the average; a mean rainfall very little above the average, falling on one day fewer than the average; four days excess of south-westerly winds. The mean barometric pressure was 29.976 inches, or 0.132 inch in excess of the average, the excess being rather greater in the south and the east than in the north and west. Hence the greater prevalence of south-westerly winds. The type of the weather was strongly anticyclonic, and as in such cases barometric pressure exceeded the average in a greater degree at inland than at coast stations. The mean temperature

was $56^{\circ}0$, or $3^{\circ}2$ above the average, the days being $4^{\circ}2$ and the nights $2^{\circ}2$ in excess. Thus the abnormally high temperature was mainly occasioned by the dry atmosphere, clear skies, and strong sunshine of the prevailing anticyclones. The excess of temperature was greatest at inland and eastern stations from Sunderland to the Cheviots, the excess varying from $3^{\circ}2$ to $4^{\circ}3$. On the other hand, it was only $1^{\circ}0$ in Shetland and little more than $2^{\circ}0$ over the west coast from Cape Wrath to the Solway. The warmest week was that ending on the 10th, when the excess above the averages at the inland stations Marchmont, Braemar, Kingussie, and Lairg was $11^{\circ}0$, while for the same week it was only $4^{\circ}4$ at Sumburgh Head. But at these inland stations the mean temperature for the last ten days of the month was $16^{\circ}0$ lower than for the week ending the 10th. The absolutely highest temperature was $86^{\circ}2$ on the 5th at Lairg, and the lowest $26^{\circ}0$ on the 25th at Stobo. The above maximum is the highest hitherto recorded in September except 1868, when the maximum temperature was $86^{\circ}5$. The mean rainfall was 3.73 inches, or 5 per cent. above the average. In Shetland, at south-western stations south of Clydesdale, and at eastern stations from the Moray Firth to the Cheviots, the rainfall was under the average, the amount collected in the more southern districts being only a little more than a fourth part of the average. Over the rest of the country it exceeded the average, the amount collected in the more southern districts being only a little more than a fourth part of the average. Over the rest of the country it exceeded the average, the excess being about 75 per cent. at Airds, Inveraray, and Dollar. The rainfall was light or *nil* from the 4th to the 7th, and 22nd to the 26th. The month was free from storms, except during the last three days, when a storm is reported in the south-west from Islay to the Solway. A remarkably fine aurora was seen on the 9th. It is interesting to note that during this remarkable month the rainfall at Ben Nevis Observatory was 24.81 inches, and the mean temperature $42^{\circ}6$, or $4^{\circ}7$ above the average. On the 20th the rainfall was 5.37 inches.

The weather of *October* was characterised by a mean barometric pressure all but the average, with a monthly range a little under it; a mean temperature the highest hitherto recorded for October, with a mean daily range

TABLE XL.—Monthly Mortality and Mean Temperature in Scotland during 1898, compared with the Mean of the Ten Years 1881–1890.

YEAR 1898.				1881–1890.	
MONTHS.	Mean Temperature.	Actual Deaths.	Proportion to 12,000 per Annum, or 1000 per Month.	Monthly Proportion of Deaths.	Mean Temperature.
January	42.9	6569	1005	1157	37.5
February	38.2	5970	914	1052	37.9
March	39.6	7802	1194	1139	38.9
April	45.6	7248	1109	1052	43.1

YEAR	47.7	78,406	12,000	12,000	45.8

slightly less than the average; a mean humidity nearly the average; a mean rainfall a little above the average, falling on the average number of days; and an unusual prevalence of easterly winds and deficiency of westerly winds. The mean barometric pressure was 29·804 inehes, being close to the average. The distribution of pressure over the country was very unusual, being above the average 0·093 inch at North Unst, and 0·030 inch at Aberdeen, but under it 0·007 inch at Stornoway, and 0·022 inch at Pinmore; and, with such a distribution of pressure, an unwonted predominance of easterly wind prevailed. The mean temperature was 50°·1, or 3°·7 above the average, and moreover the highest mean temperature yet recorded by the Scottish Meteorological Society for any October. The days were 3°·4 and the nights 3°·9 above the average. The excess of temperature was singularly uniform in all districts, being only a little higher at inland as compared with coast stations. The excess, however, was rather less in Orkney and Shetland, being at North Unst only 2°·0. With the exception of the 12th, 15th to the 18th, 30th and 31st, temperature may be regarded as having been phenomenally high for the time of the year. The absolutely highest temperature was 79°·8 on the 3rd at Lairg, and the lowest 26°·5 on the 17th at Lednathie. The mean rainfall was 4·42 inches, or 9 per cent. above the average. It was above the average at all stations on the east side of the country from the Don to the Tweed, this being the part of Scotland most exposed to the easterly

TABLE XLI.—Meteorology of Scotland for 1898, deduced from Observations made at 67 Stations of the Meteorological Society of Scotland, the particulars for each of the Stations having been published in the Quarterly Reports of the Registrar-General; also the Number of Births, Deaths, and Marriages registered during each Month of the Year 1898, as stated in the Quarterly Reports.

winds. At many places the excess was very large, being above the average, in percentages, 160 at Haddington, 133 at Smeaton, 122 at Broomlands, near Kelso, and Perth, and 110 at Tillypronie. It was also above the average, but slightly, west of the Moray Firth from Cromarty northwards, and in Shetland. Over all other districts it was less than the average, particularly from Cape Wrath as far south as Islay, the general deficiency being about 50 per cent., these being the districts more completely protected from the rains of the easterly winds. The greater part of the rain fell during the latter half of the month, the first fortnight being generally dry. At many eastern stations the rainfall of the 17th and 18th was very heavy, the amounts, in inches, being 3·40 at Haddington and Perth, 2·87 at Dundee, and 3·21 at Marchmont.

The weather of *November* was characterised by a mean barometric pressure a good deal under the average, with a monthly range greatly under it; a mean temperature about a degree above the average, with a mean daily range also a degree above it; a mean humidity the average; a mean rainfall considerably above the average, falling on a day more than the average; and the winds nearly the average, both as regards force and direction. The mean barometric pressure was 29·753 inches, or 0·068 inch less than the average. The deficiency was pretty evenly distributed over the country, being only a little more pronounced in the extreme north than in the south. The mean temperature was 41°·7, or 1°·1 above the average, the days being 1°·5 in excess and the nights 0°·5. The excess of temperature was rather greater in the south than in the north, but on the whole it may be regarded as pretty evenly distributed among the stations. The absolutely highest temperature was 61°·0 on the 2nd at Edinburgh and the 12th at Glencarron; and the lowest 6°·0 on the 29th at Stobo. During the first three weeks the relatively high temperature of the previous month

was continued, but during the last ten days of the month temperatures were much lower. The mean rainfall was 5·05 inches, or 32 per cent. above the average. This is rather a large mean rainfall for November. In a few detached districts in the counties of Shetland, Ross, Inverness, Argyll, Aberdeen. and in Galloway, the rainfall was under the average, but the deficiency anywhere scarcely exceeded 30 per cent. Everywhere else the rainfall exceeded the average, there being about 90 per cent. of excess at Stornoway, Thurso, Cupar, North Esk Reservoir, and Stobo Castle. On the first four days of the month strong westerly winds prevailed, accompanied with very heavy rainfalls, the amounts for these four days exceeding five inches at a good many places. The rains from the 23rd to the 25th were also very heavy. Snow frequently fell from the 21st to the 29th.

The weather of *December* was characterised by a mean barometric pressure somewhat less than the average, with a monthly range considerably above it; a mean temperature higher than any recorded since December 1857, which was 2°·4 higher; a mean daily range considerably above the average; an exceedingly low mean humidity, no lower having previously occurred, except in 1874; a mean rainfall phenomenal both as regards amount and manner of distribution among the stations; and an extraordinary predominance of west-south-westerly winds, blowing with a mean force only exceeded by the December of 1892. The mean temperature was 42°·6, or 4°·8 above the average, the days being 5°·3 and the nights 4°·2 in excess. The excess was small, scarcely amounting to a degree, in the extreme north of the Hebrides, Orkney, and Shetland; but it gradually increased on proceeding southwards till in inland situations south of the Grampians it exceeded 6°·0, and generally the excess was greater at east than at west coast stations. The absolutely highest temperature was 59°·0 on the 5th at Boyndie, and on the 25th at Airds; and the lowest 17°·0 on

TABLE XLIII.—Deaths, Temperature, and Fall of Rain in Eight of the Principal Towns of Scotland during each Week of the Year 1898; also the Proportion of Deaths to every Thousand of the Population.

the 31st at Aberlour and Lednathie. Except on the last two days of the month high temperatures ruled throughout. The mean rainfall was 6·07 inches, or 53 per cent. above the average. It is scarcely possible to point to a previous month when the amounts recorded at the different stations showed differences so extraordinary. To the east of a line from Hadd House, passing Perth, Loch Leven, Edinburgh, and Kelso, the rainfall was under the average, the deficiency being greatest at places near the coast from the Don to the Tweed, being about 50 per cent. It was also under the average over the extreme south-west of Galloway. In all other parts of the country it was above the average, rising to more than double the average over extensive breadths. The heaviest rainfalls were at places north of the Grampians, the largest, stated in percentages above their averages, being 219 at Glencarron, 212 at Kingussie, 203 at Stornoway, 185 at Cromarty, and 178 at Fort-William. The largest absolute rainfall at any of the stations was 23·20 inches at Fort-William; at Glencarron the amount was 21·65 inches, and at Stronvar, 18·01 inches. On the other hand, the three smallest amounts were 1·03 inch at Haddington, 1·17 inch at Arbroath, and 1·35 at Dundee. Falls of more than an inch a day were frequent during the month. Widespread storms occurred on the 1st to 2nd, 7th to 10th, 14th, 18th to 19th, 22nd to 23rd, 27th, and 31st.

Tables XL. and onwards are prepared as usual to illustrate in some degree the connection between the general mortality, as also that of certain diseases, and the meteorological conditions of the successive months of the year, the data for which being supplied mainly from the returns made by observers in eight of the Principal Towns in the country.

Tables XL. and XLI. deal with Scotland as a whole, and from the former it is seen that the mean temperature for the year was 47°·7, considerably higher than the mean of a series of years placed alongside for comparison. The mean temperature of each month of the year under review—1898—is higher than those for the ten years, with the exception of May, which is lower, that for July being the same.

TABLE XLIV.—Monthly Deaths at Four Periods of Life in Eight of the Principal Towns of Scotland during the Year 1898, and Proportion at each Age in every Hundred Deaths per Month.

December . .	917	180	888	599	2584	35·5	7·0	34·3	23·2	100
YEAR . . .	12,754	2,334	10,287	6,778	32,153	39·7	7·3	32·0	21·0	100

Table XLI. indicates in a general manner how the mortality is heaviest during or immediately after the colder and more inclement months of the year and least so during the warmer, inasmuch as 9·95 per cent. of the deaths were registered during March, 9·24 per cent. during April, 8·90 per cent. during May, 8·30 per cent. during January, 8·31 per cent. during December, 8·13 per cent. during August, 8·09 per cent. during October, 7·99 per cent. during June, 7·98 per cent. during September, 7·86 per cent. during November, 7·61 per cent. during February, and 7·55 per cent. during July.

Table XLII. shows the connection between certain atmospheric phenomena and the mortality from some diseases as occurring in eight of the Principal Towns of Scotland. Miasmatics caused their largest number of deaths during the months of April, May, June, and July, to be accounted for by the prevalence of Measles and Hooping Cough during the same period and the mortality from those being then at its greatest. Small-pox caused but one death in these towns during the year. From Scarlet Fever 40 deaths were registered during January and 46 during December, the smallest number—viz., 25—during June and September. Diphtheria as a cause of death is most in evidence during the early and late months, the opposite occurring during May, June, and July; and Fevers bulk most largely during the months of September, October, November, and December.

Diarrhoeal affections are, as usual, registered as causes of mortality most markedly during the months of late summer and of autumn—July, August, September, and October.

Phthisis claims a heavy toll of the population during each month, but a larger number of deaths is registered during the first than during the second six months of this year.

The more acute diseases of the Respiratory Organs, as Bronchitis and Pneumonia are especially influenced by climatic conditions, the result being that the greatest mortality from those occurred during the early and late months of the year, the largest number of deaths being registered during

TABLE XLV.—Months equalised to 31 Days, and Deaths at each Age corrected thereto, in order to show the relative Mortality at each Age in Eight of the Principal Towns during each Month of the Year 1898.

MONTHS.	Relative Number of Deaths in 1898.					Monthly Deaths proportioned to 1000 per Month or 12,000 per annum.
	0-5 years.	5-20.	20-60.	60 and above.	Total.	
January	928	190	897	605	2620	960
February	960	210	917	611	2698	988
March	1189	204	1034	735	3162	1158
April	1150	209	942	702	3003	1099
May	1079	196	960	599	2834	1038
June	1107	242	876	550	2775	1016
July	1066	189	768	450	2473	905
August	1208	191	768	495	2662	975
September	1249	172	763	516	2700	989
October	1126	193	831	514	2664	975
November	1014	206	842	536	2598	951
December	917	180	888	599	2584	946
YEAR	12,993	2,382	10,486	6,912	32,773	12,000

January, March, April, October, November, and December. Much the same is seen from the Table to be the case with diseases of the Heart and Blood Vessels, as also those of the Brain.

Tables XLIV. and XLV. are intended to indicate the comparative mortality at four periods of life during the successive months of 1898 in eight of the Principal Towns of Scotland.

The deaths of children (0-5 years) are registered in greatest numbers during the months of March, April, August, September, and October—those months in which Miasmatics generally and the more acute Pulmonary affections were specially fatal.

Among adolescents (5-20 years), deaths are registered in greatest numbers during February, March, April, May, June, and November—months when Miasmatics and Phthisis were particularly the cause.

Adults (20-60 years) suffered most during February, March, April, and May, the months when Phthisis and acute diseases of the Lungs claimed many lives.

Among the aged (60 and above) the mortality generally was at its maximum during the early and late—the more inclement—months of the year, especially the former, when Bronchitis and Pneumonia, so frequently the cause of death at this age, were marked.

I have the honour to be,

SIR,

Your most obedient Servant,

R. J. BLAIR CUNYNGHAME, M.D.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, 5th July 1900.

APPENDIX TABLES.

VACCINATIONS IN SCOTLAND—1898.

No. of Division, &c.	REGISTRATION GROUPS, DIVISIONS, AND COUNTIES.	Success- fully Vaccina- ted.	Vacci- nation Post- poned.	Insusceptible of Vaccine Disease			Died before Vaccina- tion.	Removed from District before Vaccina- tion, or otherwise unaccount- ed for.	Total Births for 1898.
				On the ground of Constitu- tional Insuscep- tibility.	In respect of the Children having already had Small-pox.	On the ground of previous Successful Vaccina- tion.

Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing To of 2000 Inhabitants and upwards are printed in small capitals, thus:—CARLUKE.

N.B.—An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated or comprise more, or parts of more, than one Parish, and the component parts of these Districts will be found at page 474.

A dagger "+" is prefixed to those Districts which consist of only a part of a Parish of the same name.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
26	Sanday	Lady, and part of Cross and Burness.
37b	Keiss	Parts of Canisbay and Wick.
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin and Urray.
86b	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
92b	Cannich	Parts of Kilmorack and Kiltarlity and Convintn.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
135	Elgin	Elgin, and parts of New Spynie, and St Andrews-Lhanbryde.
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrinnnes	Parts of Aberlour and Mortlach.
167	Seafeld	Parts of Cullen and Rathven.
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kinnimonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick, Tullich, and Glengairn.
222b	Mullbex	Parts of Fyvie and Monquhitter.
227b	New Pitsligo	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter	(1) Parts of City Parish of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Forgue.
266	Nigg	Part of City Parish of Aberdeen and Nigg.
282	Dundee	Dundee, and part of Liff, Benzie, and Invergowrie.
294b	Kilry	Parts of Glenisla and Lintrathen.
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Auchtergaven and Logiealmond.
331	Balquhiddier	Balquhiddier, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Part of Dunkeld and Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle	Meigle, and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and part of Kinnoull.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenantry	Parts of Blair-Athol and Moulin.
402	Anstruther-Easter	Anstruther-Easter, and part of Kilrenny.
417	Crail	Part of Crail and May Island.
428	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall	Kirkcaldy, Abbotshall, and part of Kinghorn.
481b	Grangemouth	Parts of Bothkennar, Falkirk, and Polmont.
488	St Ninians	St. Ninians, and part of Stirling.
496	Dumbarton	Dumbarton, and part of Cardross.
505	Ardnamurchan,	(1) Parts of Ardnamurchan, and Arisaig and Moidart; (2) Remainder of Arisaig and Moidart.
506	Ballachulish, etc.	Parts of Kilmallie, and Ardgour.
509	Cumlodden and Minard	Parts of Glassary and Glenarary.
513	Inveraray	Inveraray, and part of Glenarary.
515	Kilbrandon and Kilchattan	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc.	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie,	Parts of Kilmallie, and Ardgour.
525	Lismore	Lismore and Appin, and part of Kilmallie.
526	Lochgilthead	Parts of Glassary and South Knapdale.
529	Muckairn	Parts of Ardchattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow)	Part of Kilarrow and Kilmeny.
543	Kilmeny	Part of Kilarrow and Kilmeny.
545	Kinlochspeltvie	Part of Pennygown and Torosay.
547	Portnahaven	Part of Kilchoman.
548	Salen	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory	Part of Kilninian and Kilmore.
550	Torosay	Part of Pennygown and Torosay.
556	Lochranza	Parts of Kilbride and Kilmorey.
559b	Bride-of-Weir,	Parts of Houston and Killellan, and Kilbarchan.
572	Neilston	(1) Part of Neilston; (2) Remainder of Neilston, and part of Paisley.
576	Ardrossan	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
584b	Crosshill	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine	Irvine, and part of Dundonald.

* The actual number of Districts is 1071—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 6 and 14 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place compound names in the order in which they are pronounced.
